

# Vidadance

dance shoes for guys

Size selector

3 inches

8 cm

NB: measure one of these lines after printing and if the length is wrong then set scaling to "none" in your print options and try again.

If it is still wrong then save onto your computer and print from there.

## Instructions:

- 1) measure one of the lines in the centre to check your printer hasn't scaled the image.
- 2) line up the back of your heel directly above the back of the outline.
- 3) choose the size that gives you a comfortable amount of toe-room.
- 4) don't worry if your foot is wider than the outline.
- 5) if you normally wear a UK half-size the next smaller whole size should suit. (eg for 8½ try an 8)
